

**REMARKS**

Claims 1 and 3-17 are pending in this application. By this Amendment, claims 1 and 3-14 are amended, claims 15-17 are added, and claim 2 is canceled. Reconsideration based on the above amendments and the following Remarks is respectfully requested.

**I. The Specification Satisfies All Formal Requirements**

The Office Action objects to the specification for informalities. According, the title is amended and the specification has been amended in accordance with the Examiner's suggestion. Withdrawal of the objection to the specification is respectfully requested.

**II. The Claims Define Patentable Subject Matter**

The Office Action rejects claims 1, 2 and 12 under 35 U.S.C. §103(a) as unpatentable over U.S. Patent No. 6,069,593 to Lebby et al. in view of U.S. Patent No. 6,501,448B1 to Komiya. Claims 4, 7 and 8 are rejected under 35 U.S.C. §103(a) as unpatentable over Lebby in view of Komiya and further in view of 2001/0035849A1 to Kimura. Claims 5, 6 and 9d-11 are rejected under 35 U.S.C. §103(a) as unpatentable over Lebby in view of Komiya and further in view of 2002/005824A1 to Oshitani. Claim 13 is rejected under 35 U.S.C. §103(a) as unpatentable over Lebby in view of Komiya and further in view of U.S. Patent No. 4,568,928 to Biferno. These rejections are respectfully traversed.

The applied art does not teach, disclose or suggest a mobile terminal which includes an organic electroluminescent device and a liquid crystal device to display images with the mobile terminal being capable of being folded such that the organic electroluminescent device faces inside while the liquid crystal device faces outside, as claimed in claim 1.

Instead, Lebby discloses a display carrier and electronic display control for multiple displays in a portable electronic device. Specifically, Lebby discloses, as best shown in Figures 1 and 2, the virtual image display 24 having dual modes of magnification. A large directive view display 26 is a non-emissive liquid crystal display (LCD) and small direct view

display 28 is an emissive display such as one utilizing organic electroluminescent technology. Accordingly, the features recited in claim 1 are not disclosed in Lebby. Further, the additional applied art does not make up for the deficiencies of Lebby discussed above.

Again, claim 1 as amended recites that in a folded state, the organic EL display device faces the inside and the liquid crystal display faces the outside. In contrast, Lebby discloses that the liquid crystal display device and the organic EL display device are arranged on the same surface.

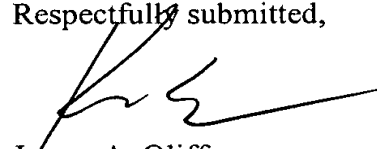

Accordingly, withdrawal of the rejection of claims 1-14 under 35 U.S.C. §103(a) is respectfully requested.

### **III. Conclusion**

In view of the foregoing, it is respectfully submitted that this application is in condition for allowance. Favorable reconsideration and prompt allowance of claims 1 and 3-17 are earnestly solicited.

Should the Examiner believe that anything further would be desirable in order to place this application in even better condition for allowance, the Examiner is invited to contact the undersigned at the telephone number set forth below.

Respectfully submitted,
